

Arkal Filtration Systems implements clean-water technologies to provide cost-effective filtration solutions for industrial, municipal, commercial and agricultural applications.

Our dynamic solutions, including our patented automatic Spin Klin filtration technology, incorporate polymeric systems that feature modularity, flexibility and corrosion resistance.

Arkal has been providing filtration solutions for over 30 years. Our vast experience comprises innovative product development and design. We utilize our international marketing and distribution network to provide service and support to our customers worldwide. As a result, process efficiency is optimized, product quality is ensured; waste reduction occurs and crop yields are enhanced.

By introducing disc filtration technology to the filtration world, Arkal became and remains a recognized world leader in filtration technologies. Our broad experience, service orientation and wide product range enable us to tailor solutions according to customer requirements.
