

Oil skimming is the lowest cost way to remove oil from water.

Abanaki, the world leader in oil skimmer products, manufactures a wide range of products to remove hydrocarbons from water. Proven in thousands of applications, Abanaki oil skimmers have a reliable, low maintenance design.

Machine Tool Industry Product Shopper

Mighty Disk™ Oil Skimmer

The compact, portable way to remove unwanted tramp oils from coolants and parts washers. Removes 1 1/2 gph of oil or more. Put it to work right out of the box!

Coolant Mints

End that nasty rotten egg smell. One tablet maintains 25 gallons of coolant for an entire week.

TubeTastic!™ Oil Skimmer

Use with little or no access to the coolant sump from above, even in totally enclosed machining centers. Removes up to 1 1/2 gallons of oil per hour.

CoolerCooler™ Coolant Refresher

Pumps out oil and refreshes coolant. Extends coolant life, reduces disposal costs, improves tool life and helps prevent dermatitis. Processes 1 gallon per minute.

Refractometers

Keep your coolant concentration levels under control! 0-32% Brix scale with "ATC," accurate to .2% Brix. Aluminum construction. For use with coolants and cleaners. Optional internal light source available!

Portable pH Meter

Monitor your coolant pH levels quickly and easily. 0-14 pH range. Operating temperature range from 41° to 122°F. ATC: Automatic Temperature Compensation for accuracy.

Model 100

Economixer™

Accurately mixes coolant concentrates with water and dispenses the diluted solution. The Model 100 offers a variety of tips for dilution ranges of 4 1/2:1 to 400:1. The Model 200 offers a knob adjustment for dilution ranges of 15:1 to 45:1.

Mighty Mini™ SST Oil Skimmer

Smallest and lightest portable oil skimmer; fits almost anywhere. Stainless steel construction. Removes up to 2 gph of oil.

EconoMini™ Coolant Skimmer

Ultra-compact belt oil skimmer designed for use in coolant sump and parts washer applications. With its small mounting footprint and light weight (approx. 6 pounds), the skimmer can fit virtually anywhere.

Chiperator™ Coolant Strainer

Makes old coolant usable again. Filters 40 gallons of chips and coolant per minute.

ChillyBits™ Air Chiller

Steady stream of cool air eliminates the expense, safety concerns and mess of mist cooling.

L'il Blue™ Oil Skimmer

Engineered polymer. Removes one gallon or more of unwanted oil and coolant from parts washers.

Q-VAC 100™

Wet vacuum swiftly removes coolant from sumps, cleans up industrial spills. Processes 24 gallons per minute. **Now available in an Explosion Proof Model.**

Oil Removal Product Shopper

Oil Grabber® Model 8

Abanaki's Flagship Oil Skimmer. Cleans wastewater in sumps, tanks and lagoons. Removes up to 40 gallons of oil per hour.

PetroXtractor® Solar or Electric

Removes up to 12 gph of oil and hydrocarbons from groundwater using recovery monitoring wells.

Grease Grabber®

Designed for particularly extreme and demanding applications such as scale pits where heavy loads of grease and oil accumulate. Removes up to 160 gph of grease.

Oil Viper

A tube-style oil skimmer great for outdoor pits with shallow water levels. Unique Clean Wipe™ design speeds oil removal.

Oil Grabber® Model MB

MultiBelt applications include truck washes, heat treating plants, oil refineries and power plants. Our five belt model removes up to 200 gallons of oil per hour.

Tote-It™ Oil Skimmer

With optional removable trough. Preferred for tight spaces and portability. Can service multiple machines, sumps or wells in plants, mobile equipment service shops or remediation sites. Removes up to 12 gallons of oil per hour from the fluid surface.

Oil Grabber® Model 4

Performs efficiently removing up to 20 gallons of oil per hour. Can be used in tanks with depths as shallow as one foot, or as deep as 100 feet.

Oil Concentrator®

Add to skimmer for virtually complete oil/water separation for recycling or disposal.
